# Andrey Dmitriev

Full Stack Developer (React / Node.js / NestJS)

Saint Petersburg | andrey.spb521@gmail.com | +7 (981) 988-98-89 | TG: @noPlanBonlyA | github.com/noPlanBonlyA

## SUMMARY

Full Stack Developer working in web development since 2022. Currently responsible for development and support of 5+ internal services (NestJS, React) used daily by 200-300 enterprise users; previously led a team of 7 on an educational platform. I cover the full cycle: API and database design, frontend, CI/CD and deployment. Comfortable running several projects in parallel and using AI tools to speed up prototyping, debugging and testing.

## SKILLS

**Frontend:** React, Next.js, Vue, TypeScript, JavaScript, Feature-Sliced Design, HTML/CSS

**Backend:** Node.js, NestJS, Express, Python, FastAPI, REST API (Swagger), WebSocket, TypeORM

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQL optimization

**DevOps & tools:** Docker, Docker Compose, GitHub Actions (CI/CD), Nginx, Linux, SSL, Git, Postman

**Practices:** unit / API / integration testing, code review, microfrontends, technical specs

**Also worked with:** PHP, 1C-Bitrix, WordPress, jQuery

## EXPERIENCE

### Full Stack Developer (Middle+) — Research Institute Gazekonomika, Center for Digital Information

*Sep 2025 – Present*

- Responsible for development and support of 5+ internal services (React, NestJS) used daily by 200-300 employees, including a corporate chatbot and workflow-optimization tools.
- Design REST APIs, data models and business logic; build React modules using Feature-Sliced Design.
- Implemented authentication and role-based access control (RBAC); integrated microfrontends into a unified enterprise platform.
- Run seminars across company centers on using AI for analysis, implementation, testing and documentation.

### Project Manager — Petersburg Pharmacies

*Sep 2025 – Apr 2026*

- Coordinated website improvements: gathered stakeholder requirements, wrote task specs for developers and tracked deadlines.

### Team Lead / Full Stack Developer — SENAT AI

*Feb 2025 – Jan 2026*

- Led a team of 7 developers through a 6-month project, delivering an educational platform to the client.
- Turned client requirements into technical specs and tasks for the team.
- Worked across the stack: Python/FastAPI and Node.js backend services with tests (about a year on the Python backend), React/Vue/TypeScript UIs and admin panels, external integrations.
- Set up CI/CD, server configuration and deployment; mentored teammates through code reviews.

### Full Stack Developer / DevOps — ITMO University Startup Project

*Nov 2024 – May 2025*

- Built an MVP of a Telegram-based AI service for 3D character customization via natural language; **2nd place** in a startup competition.
- Integrated LLM logic through FastAPI; built the Telegram bot and backend (REST + WebSocket).
- Ran DevOps: Docker Compose and GitHub Actions CI/CD; prototyped with Next.js and MongoDB.

### 1C-Bitrix / Full Stack Developer — Leadmakers

*May 2024 – Oct 2024*

- Optimized SQL queries and set up server-side caching: page load time dropped from 10-20 s to ~1 s.
- Contributed to raising Google PageSpeed from 40 to 97 on commercial projects.
- Developed custom PHP / 1C-Bitrix functionality and AJAX/jQuery features; maintained production components.

### Full Stack Developer / Technical Administrator — Driving School of Unified Standard

*Nov 2022 – Dec 2024*

- Built and launched the company site on WordPress (SEO-optimized, Google Analytics, call tracking); handled hosting, SSL and backups.

## EDUCATION & LANGUAGES

**Education:** B.Sc., ITMO University, 2026

**Languages:** Russian (native), English (B2)
